Functions

- Collect essential energy and economic data
- Visualise your performance indicators via dashboards
- Compare your different buildings / sites from a single application
- Generate automatic energy tracking reports
- Receive alerts in case of overconsumption
- Work on the most relevant action levers to reduce costs
- Customise available data
- Share the information with stakeholders to involve them in your approach

What does it do?

For industry...

Benefits

- Ergonomic interface
- Multi-user and multi-site web access
- Open and evolving system

Related services

- ISO 50001 support
- Energy monitoring expertise
- Metering plan
- Training
